PROFESSIONAL SUMMARY

Senior Software Developer (PHP - Laravel) with extensive experience architecting robust backend systems, REST APIs, and dynamic web applications. Proven track record of managing multi-tenant US-based projects and guiding development teams through complex project lifecycles. Currently expanding academic foundations through a Master of Computer Applications to complement years of practical, hands-on engineering experience.

CORE COMPETENCIES

Backend & Frameworks	PHP, Laravel, CodeIgniter, REST API Development
Databases & Cloud	MySQL, Firebase, GCP (Google Cloud Platform)
Frontend Integration	HTML5, CSS3, Bootstrap, JavaScript, Ajax, jQuery
Third Party Integration	Twilio, PayPal, Stripe, Square, Braintree, Gemini, Zoom, Google API's etc.
Leadership & Workflow	Code Reviews, Technical Architecture, Team Mentorship, Authentication & Roles

PROFESSIONAL EXPERIENCE

Tech Initiator / Inmotion MD.

Dec 2020 – Present

Sr. Software Developer (PHP - Laravel)

- Work extensively with PHP and Laravel to build backend systems and admin dashboards.
- Design and develop REST APIs used by Flutter developers and web applications.
- Handle multiple US-based projects involving authentication, roles, data workflows, and reporting.
- Act as an informal team lead, supporting code reviews and technical decisions.

Softmate Systems LLP

Feb 2019 – Nov 2020

Team Lead - Software Developer

- Led project lifecycles encompassing requirement analysis, activity sequencing, and resource planning.
- Architected and deployed robust REST APIs consumed by Android and iOS applications.
- Monitored and reported project progress, facilitating clear communication between clients and internal development teams.
- Engineered EasyComplex, a comprehensive management platform (Web, Android, iOS) using CodeIgniter, PHP, and MySQL.

Idealcrew Technologies Pvt. Ltd.

Aug 2018 – Feb 2019

Team Lead - Software Developer

- Defined project scopes and managed schedules to ensure timely delivery of software solutions.
- Collaborated directly with development teams to mitigate risks and resolve technical issues during active deployment phases.
- Developed Foster Consultants CRM using Core PHP to manage daily scheduling, invoicing, and proposal generation.

Quadron iSolutions Pvt. Ltd.

July 2017 – Aug 2018

Web Designer Developer

- Designed and developed backend database structures for enterprise web applications.
- Generated dynamic internal reports using PHP and MySQL to streamline company operations.

KEY PROJECTS

Driving Gradebook

Grading System for Driving Schools in USA & Canada

- Architected the backend using Laravel PHP and MySQL, integrating a Google Cloud project with complex OAuth verification, Cloud IAM, and OAuth Security.
- Developed REST APIs tailored for mobile applications targeting school administrators and students.
- Integrated multiple payment gateways including Braintree, Stripe, and Square.
- Automated critical email notification workflows utilizing cron jobs.

Bluebook Sports

Mobile Application for Sports Players Network

- Developed the admin console and a new Hub Owners Portal for administrator roles using Laravel PHP.
- Managed maintenance, Firebase integration, and Google Cloud Platform (GCP) configurations.
- Led team handling and coordinated development efforts across features.

Are You Shipping Me (AYSM)

Logistics & Shipment Application (Mobile/Web)

- Engineered REST APIs using PHP Laravel to power both Android and iOS applications.
- Implemented complex price calculation logic for shipments and managed the MySQL database.
- Configured automated email workflows to streamline logistics communications.

EDUCATION

Master of Computer Applications (MCA)

Ongoing

Amity University Online

Bachelor of Computer Applications (BCA)

2016

Bharatesh College of Computer Application, Rani Channamma University

LANGUAGES

English, Hindi, Marathi
